

GENERAL SIR JOHN KOTELAWALA DEFENCE UNIVERSITY

Student Stress Analysis Report

Analysis of survey data from 55 students covering stress sources, daily habits, and anxiety levels

Name : A A D E Amarathunga

Index number : D/ICT/24/0078

Degree program :Information and communication technology

Project category :Survey-Based case study

INTRODUCTION

- This study focuses on analyzing stress levels among university students. University life includes academic workload, assignments, and examinations which can increase stress. This study aims to identify the main causes of stress and understand stress levels among students.

PROBLEM STATEMENT

- University students experience stress due to academic workload, assignments, and examinations, which can affect their performance and well-being. The analysis shows an average stress level of 2.8, indicating a moderate level of daily stress. Therefore, it is important to identify the main causes of stress among students.

OBJECTIVES

- To identify main causes of stress among students
- To analyze stress levels (low, medium, high)
- To understand academic workload impact
- To suggest ways to reduce stress

DATA SET DESCRIPTION

- Source: Google Forms
- Type: Primary data
- Sample: University students
- Tool Used: Microsoft Excel
- Collected Data: Stress level (Low / Medium / High). Stress reasons (Studies, Exams, etc.)

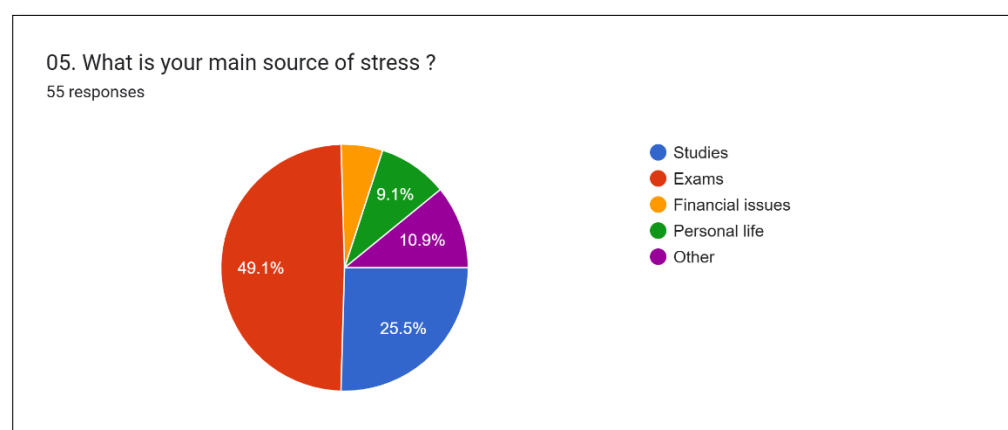

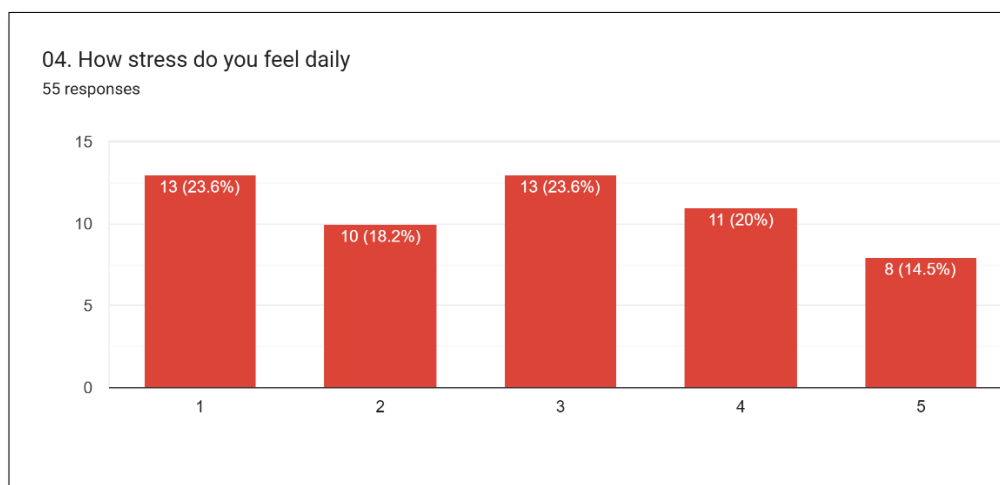

METHODOLOGY

- Google Form created
Link : <https://forms.gle/KKiWvTt6hnK85dNM9>
- Responses collected from students
- Data imported into Excel
- Data cleaned and organized
- Pivot table created
- Charts generated (Pie Chart & Bar Chart)

DATA ANALYSIS

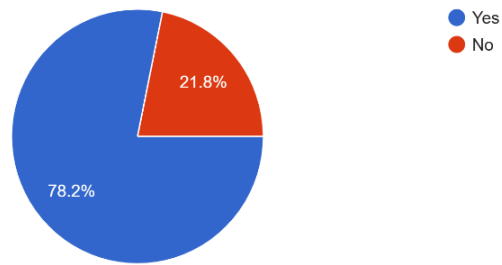

ar	1	Exams	
ar	5	Studies	
ar	2	Exams	
	2.836363636	Medium / slightly low stress	

- The average stress level is 2.83, which indicates that students experience a moderate level of daily stress.

08. Do you feel academic pressure from university ?

55 responses

FINDINGS / RESULTS

- **Main Source of Stress** - Exams are the leading stressor for 27 out of 55 students (49%). Studies rank second with 14 students (25%).

Stress Source	Students	Percentage
Exams	27	49%
Studies	14	25%
Other	6	11%
Personal life	5	9%
Financial issues	3	6%

- **Student Stress Levels** - Stress levels 4 and 5 have the highest total scores (44 and 40), indicating moderate to high stress is common.

Stress Level (1–5)	Total Score
1	13
2	20
3	39
4	44
5	40

- **Study Hours Per Day** - Most students study 3–4 hours daily. 36% study 5+ hours.

Hours	Students
1–2 hours	12
3–4 hours	23
5+ hours	20

RECOMMENDATIONS

- Improve time management skills
- Reduce assignment overload
- Provide counseling support
- Encourage group study

CONCLUSION

- This study analyzed the stress levels among university students using survey data. The results show that the average stress level is 2.8, indicating a moderate level of daily stress. The main causes of stress include exams, studies, assignments, and time management issues. Although the stress level is not extremely high, it shows that students regularly experience academic pressure. Therefore, proper time management and support systems are important to reduce stress and improve student well-being..
